

## HYDROGEN FUEL CELL GENERATOR'S

The Fuel Cell is a hydrogen PEM (Proton Exchange Membrane) fuel cell generator capable of delivering 150 W of DC power for off-grid and backup power applications. It is ideal for supplying power for long-run applications such as remote monitoring, lighting and security camera, which can be powered from 12 or 24 volt rechargeable batteries. The fuel cell is with readily available industrial hydrogen, delivered via standard steel cylinders which are self fuelled and contained within the enclosure.

### 7Kwh Cabinet Features:

- ❖ Cabinet is based on the 600 range
- ❖ Houses the fuel cell battery
- ❖ Houses one gas bottle
- ❖ One unit provides up-to 7Kwh energy
- ❖ Rapid deployment
- ❖ Temporary or permanent installation
- ❖ Ideal for cameras and other low voltage systems

### 56Kwh Cabinet Features:

- ❖ Cabinet is based on the CEC Rage
- ❖ One electronic bay
- ❖ One Gas bay
- ❖ One unit provides up-to 56Kwh energy
- ❖ Rapid deployment
- ❖ Temporary or permanent installation
- ❖ Optional fast erect mast
- ❖ ideal for cameras and other low voltage systems
